**Young Person's Risk Assessment**

The purpose of the Young Person's Risk Assessment is to make sure the health, safety and welfare of the young person has been considered with respect to their age, experience, maturity and any other factors. This Risk Assessment, in relation to young people, will take into account of:

- Their inexperience, lack of awareness and immaturity
- Work equipment intended for their use
- The organisation of processes and activities intended for them to undertake

Rating	Likelihood (L)	Severity (S)
1	Extremely unlikely	Minor injury or disease, no time lost
2	Unlikely	Injury or disease with up to 3 days lost
3	Likely	Reportable injury or disease more the 3 days lost
4	Very Likely	Major injury with long term absence
5	Extremely likely	Almost certain death

Multiply the ratings for Likelihood (L) and Severity (S) and refer to the following table:

	S	1	2	3	4	5
L						
1		1	2	3	4	5
2		2	4	6	8	10
3		3	6	9	12	15
4		4	8	12	16	20
5		5	10	15	20	25

If the risk multiplication lies above the step mark, it is adequate for the action to be recorded on the Health and Safety Risk Assessment Record. If the risk multiplication is beneath the step mark, then the action shall be either:

1. The basis of, or be included in, a standing instruction procedure
2. Modification to the existing installation, or the procurement of equipment, training or specific supervision to combat the hazard
