

Forth Valley Suicide Prevention Engagement Events

We are currently developing a Suicide and Drug Death Prevention Plan for Forth Valley. Suicide prevention is an important national and local priority and key partners are working together to deliver the actions and improvements identified locally. In order to support this, we are keen to hear from local staff, services, and communities across the Forth Valley area and, importantly, those who have experienced suicidal thoughts as well as family and friends affected by suicide.

Some people may have been involved in a national consultation that took place in 2021 to support the refresh of the Scottish Government's suicide prevention strategy however this process is different and will support the development of local plans.

Your views matter so please complete the survey [FV Suicide Prevention Plan](#) or alternatively register below to attend a facilitated engagement event. There are 6 events being hosted across Forth Valley.
